- iOS
- Selenium/Java

## Language

English - C1 (IELTS 6.0)

Polish - Native

# Adam Stelmaszyk

## Mobile Developer

I always want to create something special and useful for people. Nowadays I work as a senior flutter mobile developer, but I also develop my own applications. I love traveling, hitchhiking, and playing tennis.

## Experience

### 04.2022 - present

Open Loyalty | Remotely

#### Senior Flutter Mobile Developer

- Created **white-label loyalty mobile app**. The app helps company's clients to implement their own custom loyalty application.
- I was a key person during plan mobile app's architecture. Used in the app **Bloc** as a state management, **get\_it** and **injection**.
- I was responsible to introduce **widget**, **integration (end to end) tests** and CI/CD to project (**Fastlane**).

### 02.2021 - present

Own business - Adam Stelmaszyk | Remotely

#### Freelancer Lead/Senior Mobile Developer

As a freelancer, I created the app for startups, small companies or entrepreneurs. I also was a **technical recruiter** for Flutter junior and mid developer position.

Created apps:

- Idescu** - Developed an **e-commerce** system for selling and visualizing curtains. The app was divided into two parts: **Unity(flutter\_unity\_widget)** technology managed the **AR** part of the app (visualizing the curtains) and **Flutter** technology managed the e-commerce part. I was also responsible for the recruitment process for hiring graphic designers and backend developers.
- Bowhead Games** - Developed the app for learning drawing. Currently, the app has above **500 000** downloads. In the app was implemented the **Google Play subscription system** and **AdMob** advertising system. As a backend app used **Firebase** to store images and data. The app was especially optimized to do calls to Firebase to reduce the costs of downloading data.
- Enlivo** - Developed the app for the Austrian physiotherapy startup. The app was for physiotherapists' patients. Example feature: Patients can make video calls (**Twilio** system) or use messenger (**web\_socket\_channel**) to contact their physiotherapists, they can do exercises, AI (**tflite\_flutter**) can visualize their skeleton how it moves during the exercises, book appointment.

### 10.2020 - 04.2022

PointPack SA | Remotely/Poznań

#### Mobile Developer

- Created the mobile application which tracks picking and giving parcels from/to clients and couriers. The application was also created as a **web application in Flutter**. The application is used in the main chains in Poland, for example: Lidl, Auchan.
- Created the app for the parcels machine. This app helps users collect parcels from parcel machines, know where are the nearest machines and find the way to them.
- Created the architecture for the apps, and used state management - **Redux** and **Bloc**. Maintained tests such as **unit**, **widget**, **end to end tests**. Used CI/CD **CodeMagic**, **Fastlane (Jenkins)**.

### 03.2020 - 02.2021

Stermann APS - Remotely

#### Fronted Developer (Part-Time)

- Created and maintained two websites:

<https://fastpack.dk> - developed in **Gastby/React**, state manager - **Redux**, **GraphQL**.

<https://box4sushi.pl> - developed in **WooCommerce/WordPress**

### 04.2019 - 10.2020

XTM International - Remotely/Poznań

#### Junior Mobile Developer

- Rewrote the app** for managing translator team from **Kotlin** and **Swift** code to **Flutter** framework.
- Used **Provider** as state management

## Personal Project

**DataColligo** 06.2021 - 07.2022

- I was the start-up cofounder. The main goal was to create software to help teams working on AI/ML projects. The start-up was chosen to take part in the Polish program for start-ups (PARP 1.1.1)

**Asisto** 11.2019 - 03.2021

- I was co-founder of a mobile app for Blind People. Asisto helps blind people shop independently. The app is available in App Store and Google Play. The app got a grant from the Polish Government for MVP.
